

USAID digital health initiative: a new global mechanism

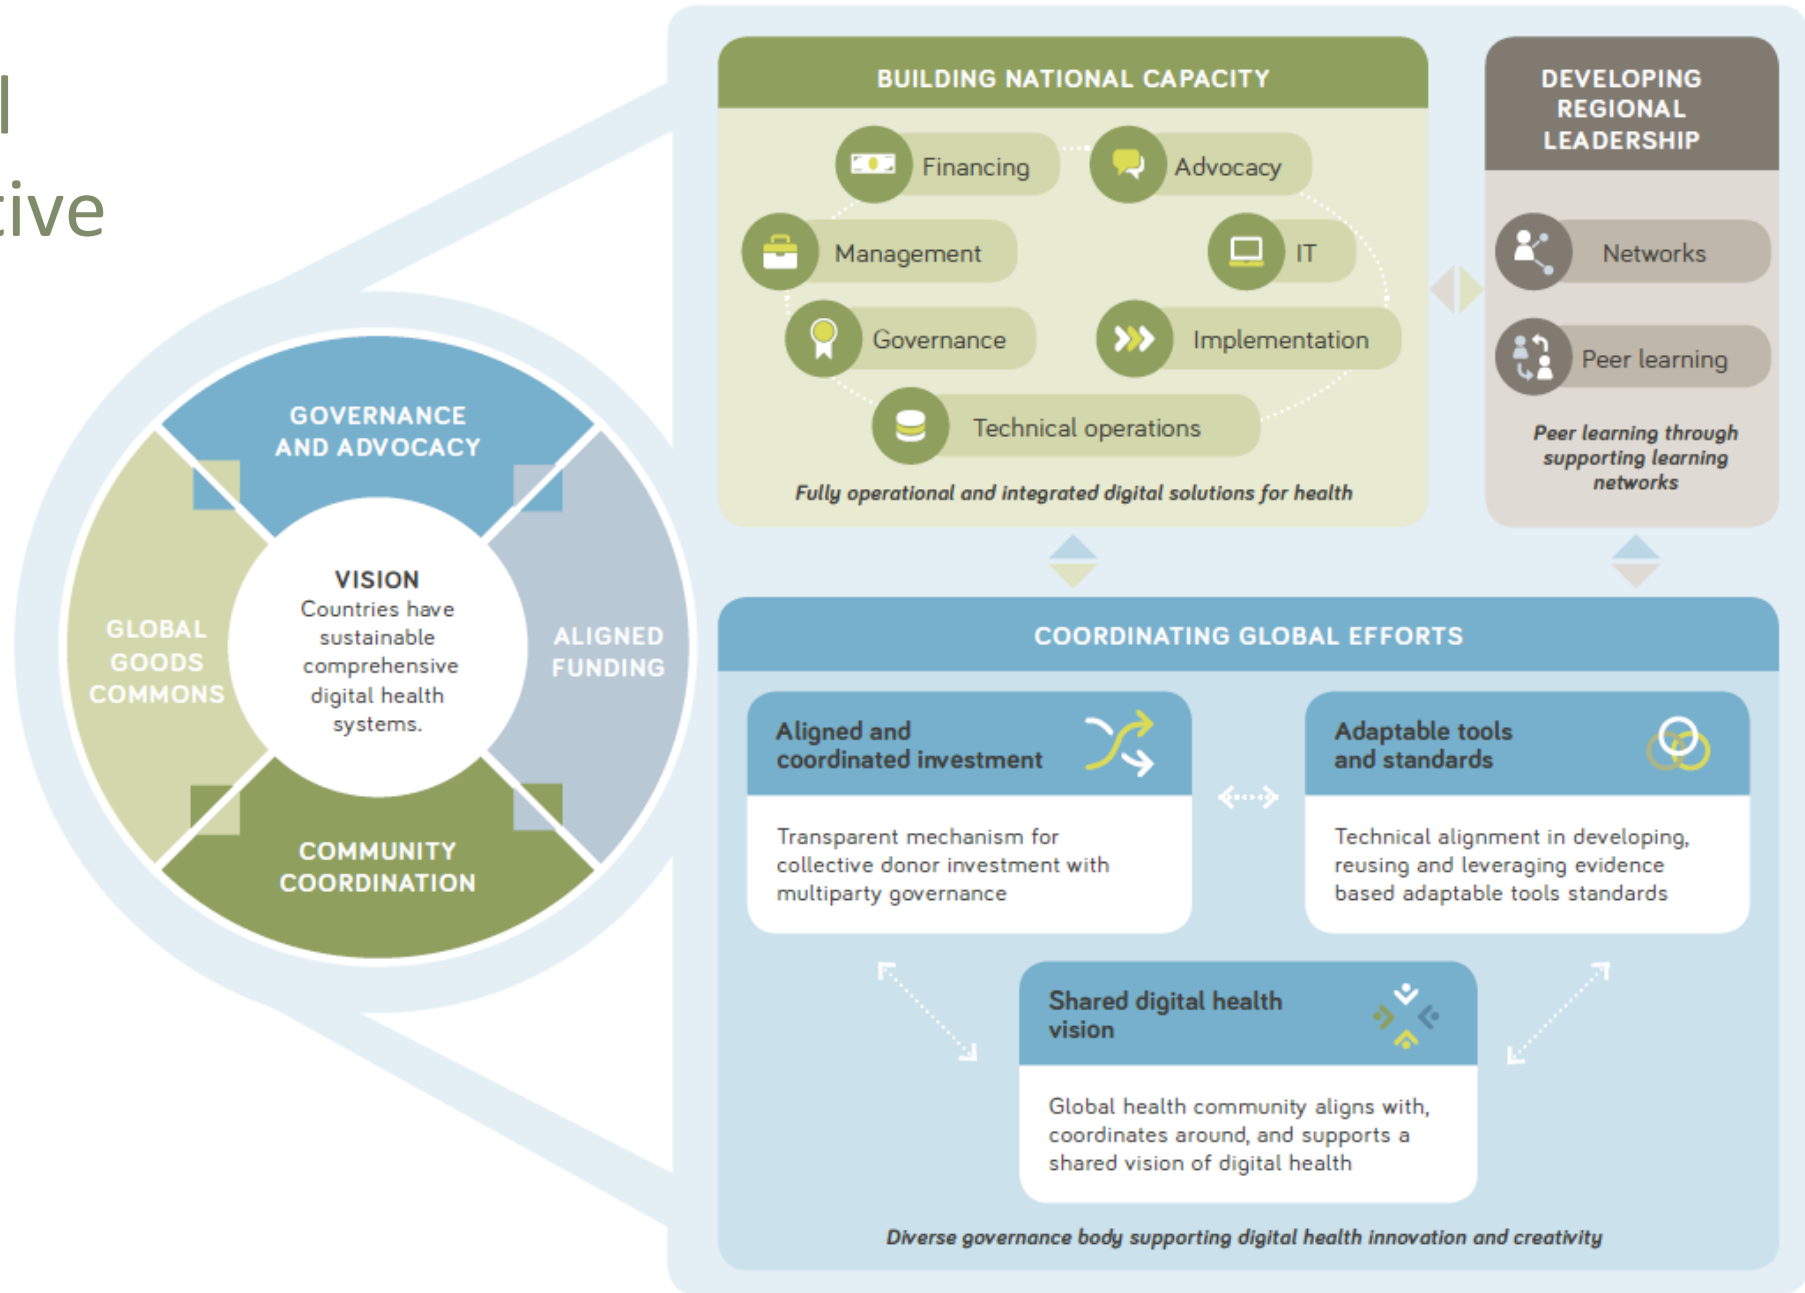

USAID digital health initiative: overview

- New *'center of gravity'* for global digital health advocacy and investment
- Partnership between USAID, PATH and 40+ partners in the digital health community
- Bringing together technology leaders, NGOs, governments, and regional networks, with local partners, to scale digital health innovations around the world
- USAID \$4.4M catalytic funding in Year 1
- Designed to be an easy digital health funding mechanism for USAID country missions and other donors

USAID digital health initiative theory of change

MISSION Countries are empowered to develop sustainable national digital infrastructures, supported by coordinated investments, so that governments and decision makers can access the information they need, when they need it, to ensure better health data and health outcomes for all.
